

PRACTICE TASK 2: DEMO DATA ANALYSIS GUIDE

KPI

1. TOTAL SALES
2. DISPLAY AVERAGE OPERATING OUTFIT
3. AVERAGE PROFIT

DISPLAY THE FOLLOWING:

SALES PER RETAILER

COMPARE SALES FROM PRESENT YEAR TO CURRENT YEAR

CREATE A CHART VISUAL FOR THE SALES (RETAILER AND BEVERAGES)

1. Data Preparation

First, I reviewed the dataset in Excel to understand the available fields such as:

- Retailer
- Beverage Type
- Sales
- Operating Profit

I ensured that the data was complete and properly formatted (no missing values, correct number format for sales and profit).

2. Total Sales

I calculated the total sales by summing all values under the **Sales column** using:

- `=SUM( range )`

This gives the overall revenue generated.

Average Operating Profit

To get the average operating profit, I used:

- `=AVERAGE(range)`

This shows the average profit performance across all transactions.

Average Operating Outfit (assuming this means Operating Profit or similar)

I computed the average using:

- `=AVERAGE(range)`

This helps evaluate general operational performance.

3. Sales per Retailer

To analyze sales by retailer:

- I used a **Pivot Table**
 - Rows → Retailer
 - Values → Sum of Sales

This allowed me to clearly compare which retailer generated the highest and lowest sales.

4. Year Comparison (Present vs Current Year)

To compare sales across years:

- I used either:
 - A **Pivot Table**, or
 - A formula like `SUMIFS`

Steps:

- Grouped data by **Year**
- Compared total sales for each year

This helped identify trends such as growth or decline in sales performance.

5. Chart Visualization (Retailer & Beverages)

To visualize the data:

- I created charts using:
 - **Bar Chart / Column Chart**

For Retailer:

- X-axis → Retailer
- Y-axis → Sales

For Beverages:

- X-axis → Beverage Type
- Y-axis → Sales

This made the data easier to interpret and compare visually.

6. Final Output

All results were presented using:

- KPI summary (Total Sales, Average Profit)
- Pivot Tables
- Charts for better visualization

This ensures that the analysis is both **accurate and easy to understand**.
